About Me

Observant and detail-oriented aspiring front-end developer with a specialization in Angular, JavaScript, CSS, HTML Seeking a platform where I can utilize my knowledge and skills efficiently and make positive differences to the organization along with professional and personal growth.

Personal Projects

Portfolio Website

Language and Framework used: **HTML | CSS | Angular**

My personal portfolio website made using HTML, CSS and Angular.

Features

- No 3rd party CSS utilities (like Bootstrap) are used.
- Responsive website.
- Observed many other websites for design Ideas.
- Explored and Used 3rd party modules to do certain task inside website like pdf.js

Expense Tracker

Language and Framework used: **HTML | CSS | Angular**

Website which allows users to add and analyze expenses graphically.

Features

- User can add/remove/edit expenses easily
- Expense will be stored inside device, and that's why data will be loaded again after refresh
- Graphical Representation of Monthly expenses for single year.
- Expenses will be sorted according to year by default.

WebAppsCollection

Language and Framework used: **HTML | CSS | Bootstrap | Angular**

Collection of 3 small websites, Integrated into single website.

Features

- Consist of 3 small apps, Tic-Tac-Toe, News-feed, Wall-clock
- Tic-Tac-Toe is simple game with small features like changing player name etc.
- News-feed allows users to search news all over the world, and comes with 2 options.
- Top headlines will allow user to search for top news, user can choose several supported category to get top-headlines for.
- Search news will allow user to search news using custom search terms, user can choose sorting type, search scope accordingly.
